EDUCATION

Ohio University, Athens, OH — Anticipated Graduation: May 2027
Bachelor of Science in Computer Science — GPA: 3.79

EXPERIENCE

Ohio University, College of Business | Thessaloniki, Greece — May 2026
Global Consulting Program | *International Business Consulting Internship*
Area of Concentration: U.S. Market Penetration for the Greek Wine Industry

- Developed a 3-phase, 24-month market penetration strategy encompassing distributor partnerships, experiential marketing, and brand awareness initiatives to support the winery's long-term expansion into Ohio and the broader Midwest
- Collaborated with a multicultural, multidisciplinary consulting team in Thessaloniki, Greece, synthesizing market research and strategic analysis into recommendations presented directly to winery stakeholders

Nationwide Insurance | Columbus, OH — May 2026 – August 2026
Design System Engineering Intern – UX Design and Research Operations

- Analyzed and visualized workforce data comparing women in technology to women across STEM fields and men in corresponding industries, translating findings into a data-driven presentation delivered at a Lunch & Learn to 120+ Nationwide associates
- Contributed to Nationwide's Bolt Design System by developing reusable UI components and improving component search functionality, helping designers and engineers more efficiently discover and implement standardized interface elements
- Explored and prototyped AI-assisted design and development workflows to identify opportunities for improving design-system documentation, component discovery, and developer productivity

Girls Who Code | Remote — June 2025 – July 2025
Teaching Assistant

- Mentored students through 4 JavaScript-based game development projects over a 2-week intensive program, providing debugging, code optimization, and individualized technical support to help students translate programming concepts into functional applications
- Transformed student concepts into working prototypes by developing Python-based technical solutions and adapting implementations to students' individual project goals, enabling students to bring ideas from initial concept through functional product

Summer Immersion Program Alumni

- Designed and developed 5 interactive websites and applications using JavaScript, HTML, and CSS, applying responsive and user-centered design principles while completing an intensive project-based software development curriculum

LEADERSHIP AND CAMPUS INVOLVEMENT

Russ College Ambassadorship Program | Athens, OH — August 2024 – Present
President

- Lead a team of 20 engineering ambassadors, coordinating college outreach and strengthening connections among students, alumni, and the Russ College community
- Organize professional development, industry tours, social events, and campus initiatives to increase student engagement and career exposure
- Mentor and advocate for engineering students by connecting peers with academic, professional, and campus resources

Association for Computing Machinery - Women | Athens, OH — January 2026 – Present
Communications Chair

- Develop campus outreach and communications strategies to increase ACM-W visibility and student engagement.
- Launched and manage the organization's social media presence, promoting events, opportunities, and membership across campus

Robe Leadership Institute | Athens, OH August 2026 – Present
Member

- Engage in strengthening leadership, communication, and interpersonal skills through experiential activities with a multidisciplinary engineering cohort

Ohio University Voinovich School of Leadership and Public Service | Athens, OH August 2026 – Present
Graduate Expo Media and Marketing Assistant

- Support marketing for Ohio University's Graduate School Expo through digital campaigns and campus advertising targeting students and faculty

Ohio University Russ College of Engineering and Technology| Athens, OH August 2026 – Present
Grading Assistant

- Evaluate coursework and provide timely, constructive feedback to support student learning and course objectives

TECHNICAL SKILLS

Programming: JavaScript, HTML, CSS, Python, C++, SQL, OCaml
Tools & Frameworks: Figma, React, Next.js, Tailwind CSS, Git/GitHub, VS Code, Tableau, MySQL, Flask, p5.js
UX/UI & Design: Design Systems, UI Component Development, Responsive Web Design, Accessibility, User-Centered Design, Data Visualization, Prototyping, Information Architecture
Additional: Agile Development, AI-Assisted Development, Debugging, Data Analysis, Cross-Functional Collaboration

RELEVANT PROJECTS

Study Abroad Storybook Website May 2026 – Present
Full Stack Web Application

- Design and developing an interactive full-stack web application that transforms study-abroad experiences into an accessible digital storybook, providing prospective students with practical guidance and a student-centered perspective on international education
- Developing the project with support from the Gilman International Scholarship Program, translating personal study-abroad experiences and resources into an engaging web-based tool for students considering international programs

Where are the Women in STEM May 2026 – July 2026
Data Visualization Dashboard

- Analyzed workforce and education data using Excel and Tableau to examine representation and advancement of women across STEM fields, from undergraduate education through senior career stages, identifying disparities and trends in career progression
- Designed an interactive Tableau data visualization comparing women in technology with women and men across STEM disciplines, translating complex workforce data into accessible insights presented to 120+ associates

Campus Navigation Application June 2026
Hackathon Web Application

- Led a multidisciplinary hackathon team in designing and developing a campus navigation web application within 48 hours using HTML, CSS, and Python to help employees more efficiently navigate a large workplace campus
- Spearheaded the application's UX/UI design and accessibility strategy, applying user-centered, accessibility-first, and brand-aligned design principles to create an intuitive experience for employees with diverse navigation needs

Deja Brew January 2025 – May 2025
Python-based Game Application

- Developed a café-themed simulation game in Python, integrating multiple interactive minigames into an end-to-end gameplay experience that simulates completing a full shift in a coffee shop
- Collaborated with a development team using Git and GitHub for version control and workflow management, incorporating user testing and iterative feedback to improve gameplay, usability, and the overall user experience

HONORS AND RECOGNITION

Benjamin A. Gilman International Scholar | U.S. Department of State Spring 2026
Dean's Scholarship | Ohio University, Athens, OH Fall 2024 – Present
Ohio Excellence Scholarship | Ohio University, Athens, OH Fall 2023 – Present
Russ Vision Scholarship | Ohio University, Athens, OH Fall 2023 – Present
